File Edit View Search Terminal Help
- store IDS alerts and Zeek logs with original timestamps
- split traffic into separate daily pcaps and store them where sgul's pcap_agent
  can find them

Requirements:
- You must be running at least Security Onion 16.04.

Warnings:
- Do NOT run this on a production deployment. It is designed for standalone systems
  designated for so-import-pcap.
- If you're running in a VM with snapshot capability, you might want to take a snapshot
  before this program makes changes.

Reverting System Changes:
- If you take a VM snapshot before this program makes changes, then just revert to
  snapshot.
- Otherwise, you can re-run Setup and it should overwrite all modified files to
  revert the system to normal operation.

If this is the first time so-import-pcap has been run on this system, then it will
make changes to the system.

Press Enter to continue or Ctrl-c to cancel.
█
```

PCAP 분석 실행: `so-import-pcap <파일명>.pcap`
-> 처음 실행할 때 뜨는 안내 및 경고 문구 Enter
(보안 분석을 위해 시스템의 설정을 일부 변경하겠다.)

```
root@purple: /home/purple

- checking /home/purple/msf2_basic_scan.pcapng
- analyzing traffic with Snort
- analyzing traffic with Zeek
- processing pcap dates 2026-01-28 through 2026-01-28
  - processing 2026-01-28
  - writing /nsm/sensor_data/purple-import/dailylogs/2026-01-28/snort.log.1769
526000

Import complete!

You can use the following hyperlink to view data in the time range of your import. You can triple-click to quickly highlight the entire hyperlink and you can then copy it into your browser:
https://localhost/app/kibana#/dashboard/94b52620-342a-11e7-9d52-4f090484f59e?_g=(refreshInterval:(display:Off,pause:!f,value:0),time:(from:'2026-01-28T00:00:00.000Z',mode:absolute,to:'2026-01-29T00:00:00.000Z'))

or you can manually set your Time Range to be:
From: 2026-01-28 To: 2026-01-29

Please note that it may take 30 seconds or more for events to appear in Kibana.
